Location: Chandigarh, India

## SUMMARY

Ambitious and technically curious B.E. Computer Science undergraduate with hands-on experience in competitive hackathons and foundational experience in Python-based data analysis and machine learning. Demonstrated leadership as a team lead in national hackathons (SIH, Sandbox, M.O.A.T.) and ability to translate ideas into working prototypes. Strong foundation in programming (C, C++), web fundamentals (HTML/CSS/JavaScript), and databases (MySQL), with introductory knowledge of ML/DL workflows.

## PROJECTS

### ML-Powered Log Anomaly Detection System with Real-Time Dashboard

Built an end-to-end machine learning system that detects anomalies in OS logs at scale by processing 11M+ HDFS log lines and classifying storage blocks using ML models. Deployed a Flask-based real-time dashboard with live anomaly streaming and performance analytics.

Key Results: 99.79% Precision, 99.97% Recall, 99.88% F1 Score, ROC-AUC 1.000 across 575,061 blocks.

Tech Stack: Python, scikit-learn, Flask, pandas, NumPy, matplotlib, seaborn, Chart.js

Models: Random Forest, Isolation Forest

Features: REST APIs, live streaming, CLI tool, evaluation dashboards

### SkillChain — Decentralized Reputation Platform

Full-stack web platform replacing resumes with verifiable proof-of-work system using tokenized reputation.

Tech Stack: React.js, Vite, Tailwind CSS, Radix UI, Framer Motion, PocketBase, JWT, Vercel

Key Features: task marketplace, token economy, badge minting, role-based access, GitHub-style submissions

Responsibilities: frontend architecture, backend integration, deployment, token system implementation

## **AI PDF Chatbot**

AI-powered document Q&A system enabling semantic search over uploaded PDFs using embeddings and LLMs.

Tech Stack: Python, Streamlit, LangChain, FAISS, OpenAI API, PyPDF

Features: PDF ingestion, vector search, context-aware responses, chunking pipeline, web UI

Outcome: simplified extraction of insights from large documents

## **Live Analytics Dashboard (Power BI)**

Interactive real-time analytics dashboard for KPI tracking and data visualization using Power BI.

Tech Stack: Power BI, DAX, Power Query, Excel/CSV

Features: interactive dashboards, KPI tracking, data transformation, drill-down analysis

Outcome: improved decision-making through visual insights

## **TECHNICAL SKILLS**

Programming: C, C++, Python (basics), JavaScript, HTML, CSS

Databases: MySQL, MongoDB (conceptual)

ML/AI: Scikit-learn, supervised & unsupervised learning, feature engineering

Data Science: Pandas, NumPy, visualization, metrics, EDA

Tools: Git, GitHub, React (basics), Node.js (basics)

## **EDUCATION**

B.E. Computer Science & Engineering — CCET Chandigarh (2024–2028, ongoing)

12th: K.B.D.A.V. Senior Secondary Public School — 91%

10th: K.B.D.A.V. Senior Secondary Public School — 95.2%

## **LEADERSHIP & EXPERIENCE**

Hackathon Team Lead (SIH, Sandbox, M.O.A.T.) — Led teams, managed Git workflows, built prototypes under deadlines.

Event Organizer (CCET) — Coordinated technical events, workshops, logistics, and promotions.

Cocurriculars: School Football Captain, Debate Winner, volunteer experience in college clubs.
